# Aref FOURATI :

is a versatile designer with a background in architecture and building. He has years of domestic and international experience in the design of large 25 Scale and complex mixed-use projects; including retail centers, hotels, high rise office And residential developments. AREF FOURATI bases his design on experience from working in several countries; always keeping simplicity artistic and functional of his concept. His qualifications multidisciplinary, painting, architecture, industrial design allows him to express his design in different disciplines, with the same vision based on an intelligent functionality and original.

I remember...

When I was young my father told me : "My son

if you are doing exactly your job, the result will be just an object .When you do something with passion, the fruit of your labor will be a valuable object". At that moment I didn't understand the meaning of these words. I thought doing my best is enough. But after a longtime I learned to be demanding. I learned that creations should rise from passion. Because creation without functionality, aesthetics and passion, remains just an object. With my commitment, my requirements nourished my passion. Today my job is my passion.

The days I work under the spotlight, is a small part of life. The life I follow is actually very simple. I cook quietly, enjoy the food slowly, do what I want to do, and create my own poetry and distance. Simplify complicates things, removes the burden of life, and permeates simplicity into a porridge, a meal, a cat and a dog, every word and action, warm and down-to-earth, which is the way to yearn for life.
